

**STATE OF CALIFORNIA
CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY
STATE WATER RESOURCES CONTROL BOARD**

DIVISION OF WATER RIGHTS

PERMIT FOR DIVERSION AND USE OF WATER

PERMIT 21010

Application 29664 of **Garrapata Water Company, A California Corporation**
c/o Donald M. Layne
36652 Highway 1, Coast Route
Monterey, CA 93940

filed on **February 21, 1990**, has been approved by the State Water Resources Control Board (SWRCB)
SUBJECT TO PRIOR RIGHTS and to the limitations and conditions of this permit.

Permittee is hereby authorized to divert and use water as follows:

1. Source of water

Source
Garrapata Creek

Tributary to
Pacific Ocean

within the **County of Monterey**

2. Location of point of diversion

By California Coordinate System in Zone 4	40-acre subdivision of public land survey or projection thereof	Projected Section	Township	Range	Base and Meridian
North 406,750 feet and East 1,143,600 feet	NE ¼ of NE ¼	36	17S	1W	MD

3. Purpose of use	4. Place of use	Section	Township	Range	Base and Meridian	Acres
Municipal	NW ¼	31	17S	1W	MD	
	SW ¼	31	17S	1W	MD	
	NE ¼	36	17S	1W	MD	
	SE ¼	36	17S	1W	MD	

The place of use is shown on map on file with the SWRCB.

5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed 35 acre-feet per annum to be diverted from January 1 to December 31 of each year. The rate of the diversion shall not exceed 0.11 cubic foot per second.

(0000005A)

6. This permit shall not be construed as conferring upon the permittee right of access to the point of diversion.

(0000022)

7. Permittee shall install and properly maintain a meter, satisfactory to the Chief of the Division of Water Rights, which is capable of measuring the instantaneous rate of diversion in gallons per minute and the cumulative quantity of water diverted in gallons. The meter shall be conveniently located so as to be accessible for reading by the SWRCB or its designated representative.

Permittee shall record the cumulative meter readings approximately the first of each month. Meter readings shall be supplied to the SWRCB with the annual progress report submitted to the SWRCB by permittee.

(0070047) (0100047)

8. For the protection of public trust resources of Lower Garrapata Creek, the permittee shall allow visible flow in Garrapata Creek downstream of the point of diversion. If visible flow does not exist in Garrapata Creek, downstream of the point of diversion, the permittee shall cease diversions or augment the stream flows to ensure a visible flow exists. This term does not apply if the permittee can document that 100 yards upstream of the point of diversion there is no visible flow.

(0350900)

9. The permittee shall maintain written records regarding the observations of visible flow both upstream and downstream of the point of diversion. Observations shall be made on a weekly basis during the period June 1 to October 30 and made available to the Division upon request. If visible flow does not exist at any time, the frequency of observations shall be on a daily basis until visible

surface flow exists for at least 14 consecutive days. In the event of a violation of this term, the permittee shall immediately notify the Chief of the Division of Water Rights.

(0090400)

ALL PERMITS ISSUED BY THE STATE WATER RESOURCES CONTROL BOARD ARE SUBJECT TO THE FOLLOWING TERMS AND CONDITIONS:

- (A) Permittee shall maintain records of the amount of water diverted and used to enable SWRCB to determine the amount of water that has been applied to beneficial use pursuant to Water Code section 1605.
- (B) The amount authorized for appropriation may be reduced in the license if investigation warrants.
- (C) Progress reports shall be submitted promptly by permittee when requested by the SWRCB until a license is issued.
- (D) Permittee shall allow representatives of the SWRCB and other parties, as may be authorized from time to time by said SWRCB, reasonable access to project works to determine compliance with the terms of this permit.
- (E) Pursuant to California Water Code sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of SWRCB in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the SWRCB may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the SWRCB also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest; and is necessary to preserve or restore the uses protected by the public trust.

(F) The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the SWRCB if, after notice to the permittee and an opportunity for hearing, the SWRCB finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the SWRCB finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

(G) This permit does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2097) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the permittee shall obtain an incidental take permit prior to construction or operation. Permittee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this permit.

This permit is issued and permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

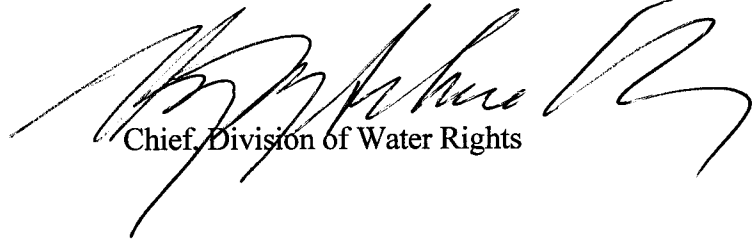

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water

Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).
